## EXPERIENCE

### Engeselt Softwares, Brazil — *Product Owner*

JUNE 2023 - PRESENT

As a Product Owner, my main role is to coordinate the development of the product, from defining requirements to validating functionalities. I prioritize the backlog, facilitate communication, guide the team, and iterate based on feedback. My goal is to ensure that we continuously deliver value to customers, adapting the roadmap as needed.

### Engeselt Softwares, Brazil — *Software Developer*

AUGUST 2022 - JUNE 2023

Responsible for developing and maintaining the features of the company's ERP system, using the Python programming language along with the Django and Django Rest Frameworks. I implement and manage Docker containers to ensure a consistent and isolated execution environment. Additionally, I utilize the Celery framework to orchestrate asynchronous tasks, ensuring that the system is highly efficient and scalable. My responsibilities range from designing and implementing new features to troubleshooting and optimizing system performance.

### Hospital Napoleão Laureano, Brasil — *Intern, Software Developer*

JUNE 2021 - AUGUST 2022

I developed several systems in a hospital environment, including a Kanban board using Flask and Oracle for tracking hospitalized patients, fed by the MV2000 system. I created a system to generate a list of APACs produced in the current month. I developed a corporate intranet with Django and MySQL, integrating authentication via Active Directory, to facilitate internal communication among employees. I built a DHCP machine management system using Django and Shell Script, allowing insertion, updating, and querying of devices on the hospital's network, as well as restarting altered services. Finally, I developed a customized reporting system with Flask, enabling export to Excel or on-screen viewing.

### IFPB, Brasil — *Intern, Software Developer*

JUNE 2021 - AUGUST 2022

Development of a web system for the faculty of the Federal Institute of

## SKILLS

Python  
Django & Flask & FastAPI  
Java & Spring  
SQLAlchemy & Alembic  
Celery & Redis  
Relational Database & NoSQL  
Vue.js & Nuxt.js  
Tailwind & Bootstrap  
Google Cloud & AWS  
Docker  
Web Development  
Technical Requirements  
UI Prototype

## LANGUAGES

English, Intermediate.  
Spanish, Intermediate.  
Brazilian Portuguese, Native.

Education of Paraíba, Cajazeiras campus, to request document printing in an online and efficient manner. This system was designed exclusively for faculty use, aiming to streamline the request process and improve the efficiency of meeting their needs.

## EDUCATION

### **Cruzeiro do Sul, Brazil — *Internet Systems***

FEBRUARY 2023 - DECEMBER 2024

Currently, I'm enrolled in Internet Systems. The course includes subjects aimed at enhancing my programming skills and solidifying knowledge in other areas related to cloud development and server maintenance.

### **Instituto Federal da Paraíba, Brazil — *Computer Technician***

MARCH 2015 - OCTOBER 2018

Integrated high school technical course where I began my development as a Python/Django programmer.
